

Q123 - Electrostatic Discharge Protection

Goods ordered by this purchase order/contract require electrostatic protection and must be properly packaged and identified. The Seller shall ensure that ESD protection is compliant with applicable Pratt and Whitney Rocketdyne standards and specification. All goods must be shipped with their leads electrically shorted together in noncorrosive, conductive foam or other suitable method of packaging. All goods shall be placed in conductive or static-dissipative packages, tubes, carriers, conductive bags, etc., for shipment. The packaging shall be clearly labeled to indicate that it contains electrostatic sensitive goods. NOTE: Lead shorting is not required for goods such as Dual Inline Packages (DIP's) shipped in conductive rails or tubes.
