

Data packages are required for this part unless otherwise specified on the purchase order. Data packages shall contain recorded attributes data (number of passing and number of failing components) for all lot specific tests. These tests shall include quality conformance inspection Groups A, B, C, D & E testing and any read & record variables data as required by the applicable military specification for the Class or rating of procured part. When required by military specification, non-lot specific qualification data (Groups C, D and/or E) shall be provided.

Data may be submitted as a hardcopy, but CD media is preferred.
