Supplier shall perform the required Process Sample Evaluation Test, and return the evaluation samples with the shipment. Process samples (i.e., braze, plating, coating, heat treat, or bend samples) must be adequately identified for traceability. If directed in Work Instructions or PO, the supplier shall also provide a written test result.

This document is an integral part of the contract (purchase order) in which referenced. **Applicable Revision:** The revision in effect at the time the purchase order is placed.
