

Effective Date: 11/4/2019

### **Q218C - Metallic - Materials Acceptance Testing**

This materials/product is subject to Aerojet Rocketdyne (AR) Buyer Source Inspection.

Prior to requesting AR Source Inspection, Seller shall use Supplier Portal approved (laboratories) in accordance with Buyer specification, RC5166, entitled, "Supplier Material Verification Requirements".

If Seller does not have access to said system, Seller shall contact Buyer for registration and access privileges.

Seller shall be responsible for providing all related material certifications and testing data indicating conformance to the specification to AR Materials & Process Engineering (MPE) lab personnel via Icollab.

Upon completion of certification data package review, AR MPE lab will submit a lab report in the same Icollab folder; supplier and AR individual buyer will be notified via e-mail from Icollab that lab report has been attached.

Seller shall not request AR Buyer Source Inspection covered by this purchase contract until receipt of an accepted laboratory test report number from Icollab or ship product until AR Buyer Source Inspection has accomplished level of effort.

This document is an integral part of the contract (purchase order) in which referenced.  
**Applicable Revision:** The revision in effect at the time the purchase order is placed.
