

Effective Date: 12/04/2017

Q246: Serialization and Identification (MIL-STD-1189)

The following requirements are invoked for all serialized Items/Components:

1. All serial numbers per container should be on the Receipt Packing Slip.
2. Items must be labeled with barcode font and human readable representation of the serial number ID on the exterior of the primary packaging, in accordance with MIL-STD-1189.
3. Items packaged within a secondary container must also be labeled with barcode font and human readable representation of the serial number ID contained within the secondary container, in accordance with MIL-STD-1189.
